# **Best tips for Dragon Ball Z Kakarot Kakarot guide, walkthrough**

This page has starting tips for DBZ Kakarot. We have included various hints for the mechanics and situations that may cause you problems within the first hours of the game. Many of the topics described below have been discussed on other pages of the guide, including the FAQ section.

- Watch your health
- Complete substories
- Take care of your finances
- Collect Z Orbs
- Invest in healing items
- Pay attention to your opponents
- Develop your super attacks
- Sell unnecessary items
- Rest at a campfire
- Train your character
- Take care of your Ki bar

## **Watch your health**

While exploring the world in DBZ Kakarot, you will encounter a large number of opponents. Not every fight can be skipped - you should always be ready for them.

Restore your health between the fights - you can do that by eating food or resting by the fire. This way, you will avoid unnecessary frustration when you encounter an opponent while having low health.

## Complete substories

Side missions are marked on the map with a blue icon.

They provide not only additional adventures, but also great rewards. Complete them to receive experience points, D Medals, and many other interesting items.

Substories also help you develop the characters to make them invincible.

## Take care of your finances

The world is full of merchants offering quite a lot of items. You can also sell them almost everything.

At the beginning of the game, you can earn some gold by fishing and then selling your catch.

Spend the money on any healing or strengthening items. These items will help you in many battles.

## Collect Z Orbs

You will find a lot of Z Orbs in the world DBZ Kakarot. You need them to develop your character's attacks.

Don't ignore them. Try to use every opportunity to collect these valuable items.

## Invest in healing items

The game is full of fights, meaning that it is highly probable that you will lose health points. You can avoid that by purchasing healing items - Vitadrink, Vitadrink M, Vitadrink L or Healade.

Thanks to them, you will be able to heal during battles against strong enemies.

## Pay attention to your opponents

Your enemies have different attacks and most of them will try to surprise you. You need to keep an eye on the enemies - some are able to heal; others take your energy to regenerate.

If your opponent can heal without doing anything, it is possible that they are using an attack that is somehow linked to your actions. You must match your attacks to the enemy's behavior so that the fight won't last for hours.

## Develop your super attacks

Collect Z Orbs to develop your super attacks. Thanks to them, you can improve your character and increase your chances of winning.

## Sell unnecessary items

Despite the fact that your inventory is limitless, you shouldn't carry everything with you. Sell unnecessary items to have money for other, more important things, such as medicaments.

## Rest at a campfire

Use campfires located in different parts of the map. You can cook or rest there.

Resting by the fire regenerates Ki and the hero's life.

## Train your character

Don't forget about training. They unlock new super attacks for your characters. This way you will have even more power during fights.

## Take care of your Ki bar

You need to control your Ki indicator. Thanks to it you can perform dodges and super attacks.

Restore your Ki whenever you can by pressing the right buttons. This way it will be easier for you to control the character's behavior.

# Unlocking new techniques | DBZ Kakarot basics Kakarot guide, walkthrough

Post Comment 1 2

At the beginning of your adventure in Dragon Ball Z: Kakarot, you play as Goku and the rest of the characters who has rather limited combat capabilities. This is understandable since the game aims to match the development of heroes throughout Dragon Ball Z. Read this chapter to learn how to unlock new techniques.

## How to unlock new moves in Dragon Ball Z: Kakarot?

There are several ways of getting new techniques. The most important and easiest way is to collect the balls scattered around the game world. These are the so-called Z Orbs that allow you to unlock new abilities from the development tree of selected characters. Interestingly, each of the playable characters has a different talent tree. Z Orbs can be found in many places - their color depends on the region in which you have found them (blue orbs are found underwater, green in a forest, etc.). Look for these orbs to get more powerful moves for Goku and the rest of the team.

The second way to unlock new techniques is to participate in special training sessions. During them, you will fight with the spiritual projection of the currently controlled character, for example, Goku against Goku, or have a duel with already defeated enemies. To start training, you need to find special training spots and have a sufficient number of D medals. These items are also found in the game world. They are buried in various difficult to access places.

You can also get soul emblems - you get them from NPCs. You will receive these items by making progress in the storyline or after completing additional tasks. Emblems can be used to develop the community board, which will allow you to gain access to new skills.

# **Combat system | DBZ Kakarot basics Kakarot guide, walkthrough**

Post Comment 0 2

This page of our guide has information about the combat system used in Dragon Ball Z: Kakarot. You will learn how to fight, how to control your health, and how to protect yourself from attacks.

- Health points
- Ki bar
- Attacks
- Enemy health status
- Stun indicator
- Several ways to avoid damage
- Guard endurance
- Super attacks
- Boost

## **Health points**

Your health bar is displayed in the lower right corner of the screen. Keep an eye on it if you want to win battles.

If your health drops significantly, you can restore it. Information on how to regenerate health can be found on a separate page of the guide.

## Ki bar

The Ki bar is right next to the health bar. It determines the number of super attacks you can perform.

If your Ki drops significantly, you can restore it. Information on how to regenerate health can be found on a separate page of the guide.

## Attacks

In order to fight well, you must learn the controls. Each element of the combat system is assigned to a different button.

The battle controls are displayed on the left side of the screen.

## Enemy health status

The enemy's health bar is displayed in the upper right corner of the screen.

This way you can evaluate which attacks will be the best in a given situation and how to act.

## Stun indicator

The stun indicator is displayed below the enemy's life bar. When it gets depleted, the enemy won't be able to attack you for a while.

This is the perfect opportunity to inflict heavy damage on the enemy. Enemies in this state can't protect themselves which makes them an easy target.

## Several ways to avoid damage

During the battle, you can protect yourself in several ways.

### Guard

Use guard to protect yourself from attacks.

A blue shield will appear right in front of your hero.

You can use guard even during an enemy attack to reduce some of the damage received.

## Step

A step must be performed right when the enemy begins to attack you. You can't use step during an attack.

A successful step will cause the enemy to go into a slow-down state. This is an ideal opportunity to counterattack.

## Guard endurance

A guard activates a blue shield in front of you - the attacks blocked with guard will change the shield's color.

Red indicates that your guard will soon end. You have to step back to avoid getting damage.

If your guard runs out, you will be defenseless for a few tens of seconds.

## Super attacks

Before using a super attack, you need to open the attack palette and choose which one you want to perform.

Choose super attacks accordingly to your opponent's health and skills - you want to be sure that you won't waste your attack and the opportunity to deal damage.

If the enemy moves away from you while you are using a super attack, you can draw them to you to continue dealing damage.

Super attacks can be developed in the skill tree.

## Boost

To activate the boost, you need to charge two bars - Ki and Tension Gauge. Both are marked in the screenshot above.

When the boost is activated, your stats will be increased temporarily.

You can also interrupt the enemy's super attacks and regular attacks.

# Exploration and fighting with enemies | DBZ Kakarot basics

## Kakarot guide, walkthrough

Post Comment 1 2

This chapter of the guide to Dragon Ball Z: Kakarot focuses on combat mechanics. Here you will find a step-by-step guide on how to fight battles and learn a few tips. You will also learn more about exploration.

### Exploration in Dragon Ball Z: Kakarot

The game doesn't feature a completely open world. The game area has been divided into very extensive sectors that will be unlocked as the story progresses. Once you discover an area, you will be free to explore it. Your character can fly, run with stunning speed, or use, for example, the Nimbus cloud. You will also find many additional secrets, such as the titular dragon balls and numerous side activities.

The available activities are unique to specific zones. Sometimes you can complete side quests, participate in optional fights, or play mini-games. You can also collect Z Orbs that you can spend on new techniques. You can return to locations at any point of the game which means that you can leave exploration for later. If we want to go to another location, just fly high up and you will be able to choose the next destination.

## Combat in Dragon Ball Z: Kakarot

Dragon Ball Z: Kakarot recreates the main events from the cult Dragon Ball Z. Your heroes face increasingly powerful enemies - your task is to develop their abilities to make sure that the heroes are strong enough. The game is full of battles. Even though the game has other side activities, you will spend the majority of your time on fighting enemies.

The game focuses on fighting increasingly powerful enemies that should be known to every DBZ fan. Each enemy has a certain level, which affects their power, amount of damage dealt, and so on. Opponents who have a higher level than ours will deal much more damage making these battles a real challenge. If we fight low-level opponents, we will be able to defeat them in no time.

The combat system is a bit like the one used in the Xenoverse series or the older Tenkaichi Budokai titles. We will fight on the ground and in the air, use iconic techniques such as Kamehameha, or transform mid-fight.

# Character progression system | DBZ Kakarot basics Kakarot guide, walkthrough

Post Comment 1 3

This section of the guide to Dragon Ball Z: Kakarot focuses on the character progression system. You will learn how to develop your character and where to get development points. Z Warriors (Goku, Piccolo, Tien, Yamcha, Krillin, and later Vegeta) can develop in various ways, which we have described below.

- Combat
- Cooking and food
- Collecting Z Orbs
- Training
- Community Board

## Combat

Combat is the main activity in the game. You gain experience by winning fights. If your character gains a new level, they increase their statistics: HP, Ki, ATK / Ki ATK (strength of physical attacks, special techniques), Melee DEF / Ki DEF (protection from physical attacks and special attacks). Thanks to the game's open world structure, enemies can be easily found on the world map. If we want to, we can spend some time on the so-called grinding - killing opponents to strengthen our character to face a difficult enemy.

## Cooking and food

Our heroes are fighting a real invasion of enemies, so it is not surprising that they have a huge appetite. You can buy different dishes, cook food on the fire (you can fish!), or ask Chi-Chi to cook a delicious meal. In addition to a temporary stat boost, you will receive permanent bonuses for your character.

## Collecting Z Orbs

You will very quickly come across orbs with the letter Z. They are the so-called Z Orbs you need to unlock new techniques. These orbs are in different places, and their color often coincides with the territory (green balls in forest areas, blue found underwater, etc.). Different techniques require different numbers of orbs, so remember about collecting them while you are exploring the world.

## Training

Training areas are found in various locations. To use them, you need D medals, special items that are hidden in different parts of the world. You train by fighting spiritual projection of a given enemy - it is possible to duel with yourself (Goku vs Goku, etc.), or fight with already defeated enemies.

## Community Board

The last way to develop a character is to use the so-called Community Board. As you progress through the main story or complete missions, you receive emblems. These soul emblems can be placed on community boards, which will give access to new techniques, or unlock passive skills. There are seven different community boards, each offering different bonuses - a lot also depends on the placed emblems because it is possible to create a unique connection between tokens which activate all sorts of link bonuses.

# Hunting and fishing | DBZ Kakarot basics Kakarot guide, walkthrough

Post Comment 3 3

This page of our guide to Dragon Ball Z: Kakarot has information about hunting and fishing.

- Hunting
- Hunting dinosaurs

- Fishing
- Campfires

## Hunting

Hunting in Dragon Ball Z: Kakarot is very simple. You only need to approach the selected animal and press the appropriate button.

Most animals will just run away from you, so the only requirement is to chase them to get their meat.

## Hunting dinosaurs

To kill a dinosaur, you must first attack it. Deplete its HP bar and then approach to collect the items that fell out of it.

## Fishing

You can only catch fish in designated areas.

Before you start fishing, you can choose the bait. It can be purchased or found in the game world.

Fishing is about pressing the corresponding button at the right moment and then hitting the fish. This is how you get food.

## Campfires

Campfires can be found in all parts of the world. Thanks to them, you can cook meat to restore your health or strengthen your statistics.

# Cooking and eating | DBZ Kakarot basics Kakarot guide, walkthrough

Post Comment 1 4

This chapter of our guide to Dragon Ball Z: Kakarot has information about cooking and eating food. This element of the game is quite complex and affects the character development.

## Cooking and eating in Dragon Ball Z: Kakarot

The best solution to satisfy hunger and increase statistics...is cooking and eating food. Our heroes can hunt big dinosaurs and fish by taking part in simple mini-games. Thanks to this, we get materials for cooking that we can use, for example, when camping by the fire. You should try to hunt various animals and regularly eat dishes to strengthen the character.

Of course, it is also possible to purchase ready-made dishes. Some characters in the game world can cook us a delicious dish that permanently increases the statistics of our heroes. If we want someone to cook for us, we need to get the ingredients first. By making progress and completing various tasks, you will receive new recipes for dishes that will give you better bonuses. There is also the option to ask Chi-Chi, Goku's wife, to prepare a meal. Better ingredients will result in a more filling dish with greater stat bonuses.

# Saving progress | DBZ Kakarot basics Kakarot guide, walkthrough

Post Comment 1 3

This page of our guide has information on how to save your progress in Dragon Ball Z: Kakarot. You will learn when Dragon Ball Z: Kakarot saves automatically, as well as how to save manually.

- Autosave
- Manual save

## Autosave

The game saves your progress automatically after completing a mission or battle. Don't turn off the game while the save is being recorded - you don't want to damage your file.

## Manual save

You need at least 60 MB of free memory to save the game manually.

To save the game, you must open the menu and select the save option.

Your next task is to select the slot where the game should be saved.

Note that if you overwrite a file, you won't be able to restore the previous version.

Use other slots to go back to other story parts.

# Items | DBZ Kakarot basics

## Kakarot guide, walkthrough

Post Comment 1 2

This page of our guide has information about items found in Dragon Ball Z: Kakarot. We have described their types, how to use them during exploration and fights.

- Types of items
- Using items
- Using items in combat

### Types of items

Regeneration: items that restore your HP.

Cooking: items that increase your stats.

Materials: items needed for fishing, development, and crafting.

Gifts: items that you can give to someone.

Events: items used in missions or story events.

## Using items

If you aren't in the middle of a fight, you can use an item by opening the right menu.

Browse through the available items and select the one you are interested in.

## Using items in combat

If you want to use items during combat, you must first place them in the available slots. Choose an item and then the place in the available slot on the palette.

This way you can quickly use that item during combat. This is the best way to restore the hero's health.

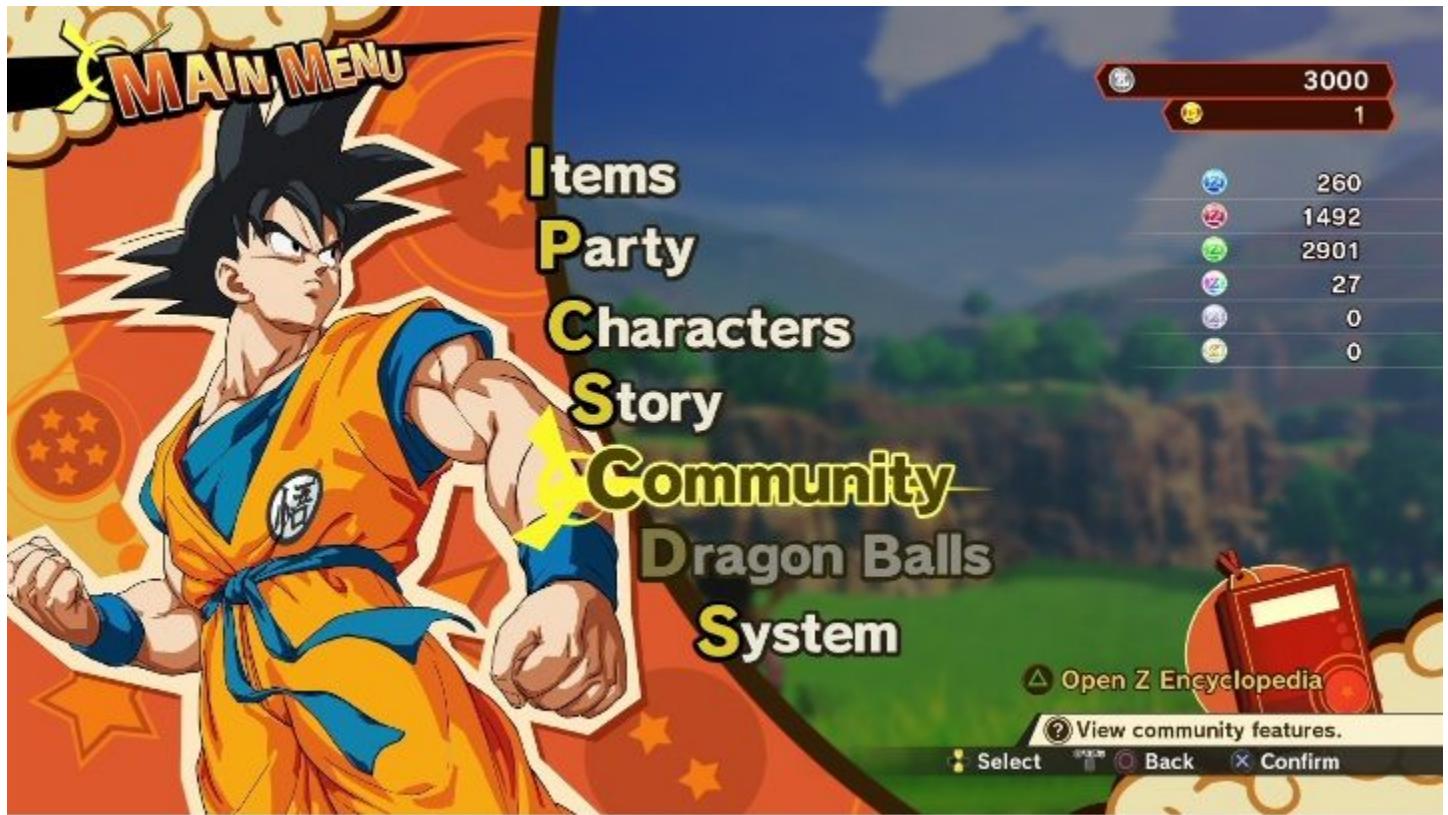

## Community | DBZ Kakarot basics Kakarot guide, walkthrough

Post Comment 1 0

In Dragon Ball Z: Kakarot, you can find a tab called community. It is mainly associated with the Soul Emblems that provide you and your friends with various bonuses.

- How can I access the community tab?
- Soul Emblems
- Types of companions
- Strengthening Soul Emblems

## How can I access the community tab?

This option is available from the menu - simply select the "Community" option.

## Soul Emblems

You can edit the Community Board and place the Soul Emblems received during the.

It is up to you to allocate these emblems.

## Types of companions

Each person who belongs to the community has a specific role. Assign emblems accordingly to their role.

Skill bonuses are activated according to the placed emblems, and their overall level increases the rank of the entire associated community. This way you will improve your team's skills.

Warriors Community: skills that help in battle.

Training Community: increases the experience points earned in battle and the health of the hero.

Community of the Gods: make it easier to get rewards.

Adventure Community: provide support in missions.

Cooking Community: improve the skills used during cooking.

Development Community: activates skills that help in developing your hero.

Adult Community: skills that help you earn Zeni effectively.

## Strengthening Soul Emblems

Soul Emblems have two parameters: friendship and proficiency.

Gifts affect the increase of these parameters. To select a gift, you just need to check the details of a given Soul Emblem and then find a specific gift.

Friendship: increases the chances of getting rare items.

Proficiency: increases the community level.

# Dragon Balls | DBZ Kakarot basics Kakarot guide, walkthrough

Post Comment 1 0

In Dragon Ball Z: Kakarot, players come across Dragon Balls which are one of the most interesting mechanics of the game. You will unlock them by making progress in the story.

- How to get Dragon Balls?
- What are the Dragon Balls for?
- Trophies/achievements

## How to get Dragon Balls?

You unlock Dragon Balls by making progress in Dragon Ball Z: Kakarot's story.

Over time, they will begin to appear in the game world. Their location will be marked on the map.

## **What are the Dragon Balls for?**

Dragon Balls are used for fulfilling your wishes. When you have one of them, click on it, and then select your wishes.

But remember that the number of wishes is limited, and a specific wish can only be selected once.

After selecting a wish, click "Call Shenron". This will fulfill your wish.

## **Trophies/achievements**

There are several achievements/trophies related to the Dragon Balls.

### **Shenron's Favorite**

Additional map areas will be unlocked as the story progresses.

# Z Orbs | DBZ Kakarot basics

## Kakarot guide, walkthrough

Post Comment 1 1

Collecting Z Orbs is one of the mechanics of Dragon Ball Z: Kakarot. You use them to perform super attacks. Z Orbs can be collected during battle or exploration of the map.

- Types of orbs
- How to collect more Z Orbs?
- Time orbs

### Types of orbs

The orbs available in Dragon Ball Z: Kakarot have different types. Their colors depend on the areas where they can be found.

1. Wastelands - red;
2. Forests - green;
3. Water - blue.

## How to collect more Z Orbs?

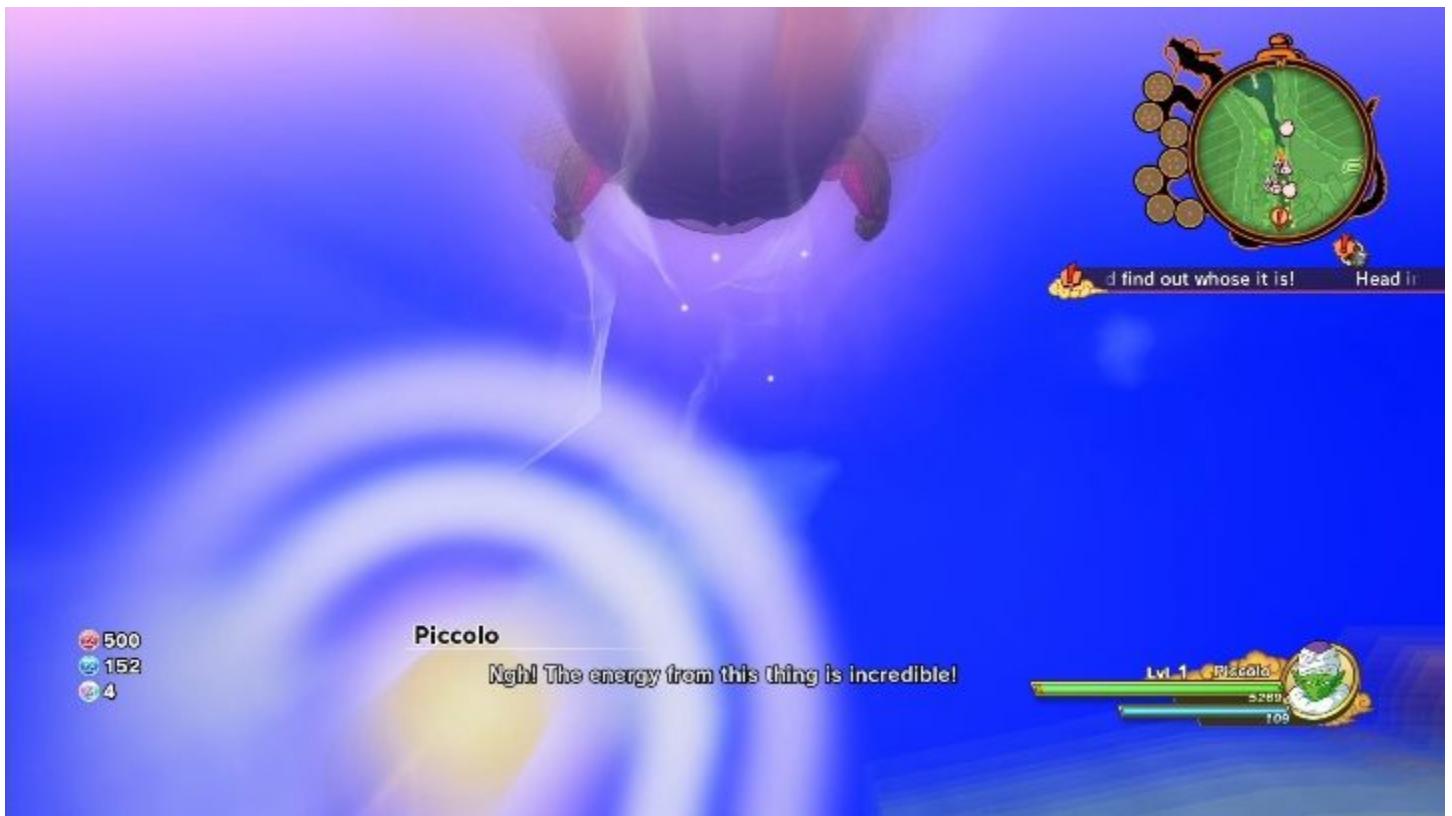

In each area, you can find special wind tunnels. They contain a lot of Z Orbs that can be collected in one go.

Remember that some orbs can also be found under water. If you decide to dive, you need to pay attention to the amount of oxygen your hero has.

## Time orbs

Time orbs can be found during exploration. If you touch it, you will spawn orbs nearby. However, they will remain active only for a limited time.

# Vegito and Gotenks | Boss in Dragon Ball Z Kakarot Kakarot guide, walkthrough

Post Comment 1 0

This chapter of Dragon Ball Z: Kakarot guide has a strategy for one of the most difficult fights in the game - against Vegito and Gotenks.

To start this battle, you need to defeat all Villainous enemies on the map. Each location has several enemies of this type - complete the story campaign first to have a high level and quickly eliminate the threat.

After defeating all the enemies, watch the cut-scene during which Vegito and Gotenks will appear. Each of them is around level 100, meaning that they are extremely powerful. Gotenks has slightly less health, so it is worth starting with him. First of all, you must have a very high level, a lot of healing items, and a high-level companion. Also, be sure to buy improved techniques for your hero.

Goku is a pretty good choice - use his Dragon Fist and fight as Super Saiyan 3. You will spend the majority of the fight on dodging because the enemies like to use their special attacks. A particularly deadly combination is when you are trapped by Gotenks and attacked by Vegito's Big Bang Attack. You need to be vigilant, use special attacks frequently, and heal with items. Remember about your friend's super attacks and try to defeat one of the enemies as soon as possible. Once you defeat one of the bosses, the fight will become much easier.

# Mira | Boss in Dragon Ball Z Kakarot Kakarot guide, walkthrough

## Post Comment 1 0

This chapter of the guide to Dragon Ball Z: Kakarot focuses on the fight with an optional boss - Mira. This opponent is the ultimate challenge and he is very strong. Below you can find tips and a strategy for this fight.

Mira is around level 100 and is very, very resistant. This fight will be harder than the battle against Gotenks and Vegito. The enemy likes to use Dark Kamehameha several times in a row and use his version of Spirit Bomb. Mira's attacks deal quite a lot of damage - you should definitely focus on dodges and blocks. A few attacks are enough to lose a huge amount of health points.

Choose the hero you like to play the most and go into battle. Super Saiyan 3 Son Goku is a good choice - his Dragon Fist can interrupt some of the enemy attacks, which is very useful in this fight. Select a high-level companion with powerful support attacks. The fight with Mira is actually very similar to any other in the game - the only difficulty may be on the opponent's high amount of health points and the fact that he is at level 100. Therefore, if you have problems with the enemy, try to level up a bit. You should also remember to train and stock up on more healing items. After winning the battle, you will encounter another character known

from the Xenoverse series. Also, all Villainous enemies are reborn, more powerful than before.

# How to avoid a fight in DBZ Kakarot? Kakarot guide, walkthrough

Post Comment 1 0

This page of our guide has information on how to avoid fights in Dragon Ball Z: Kakarot. Remember, however, that fighting is one of the main mechanics of the game, and is the main source of experience points. If you avoid fights constantly, you may have problems with defeating opponents encountered in the later story missions.

- Running away
- Markings on the map

## Running away

If you don't want to face the enemy encountered in the open world, just fly away.

But remember that running away won't give you experience points or other profits.

## Markings on the map

A marker appears when you approach an enemy while traveling on the map.

Enemies who don't plan to attack you are marked in blue. This means that you are safe until you are the one who initiated a fight.

If an enemy decides to attack you, the marker will turn red.

# How to achieve instant victory in DBZ Kakarot? Kakarot guide, walkthrough

Post Comment 2 3

This page has information about one of the ways of achieving victory in Dragon Ball Z: Kakarot. You will learn how to achieve instant victory.

- What does instant victory look like?
- Can I defeat all enemies in this way?
- Trophies/achievements

## What does instant victory look like?

An instant victory is about approaching the enemy and avoiding direct combat.

The game immediately determines that you have defeated the enemy and gives you experience points.

This way you save your time and the hero's health.

## Can I defeat all enemies in this way?

No. You can only get an instant victory against weak opponents and those who don't challenge you to a duel.

If you get close to an opponent marked blue, you can achieve an instant victory.

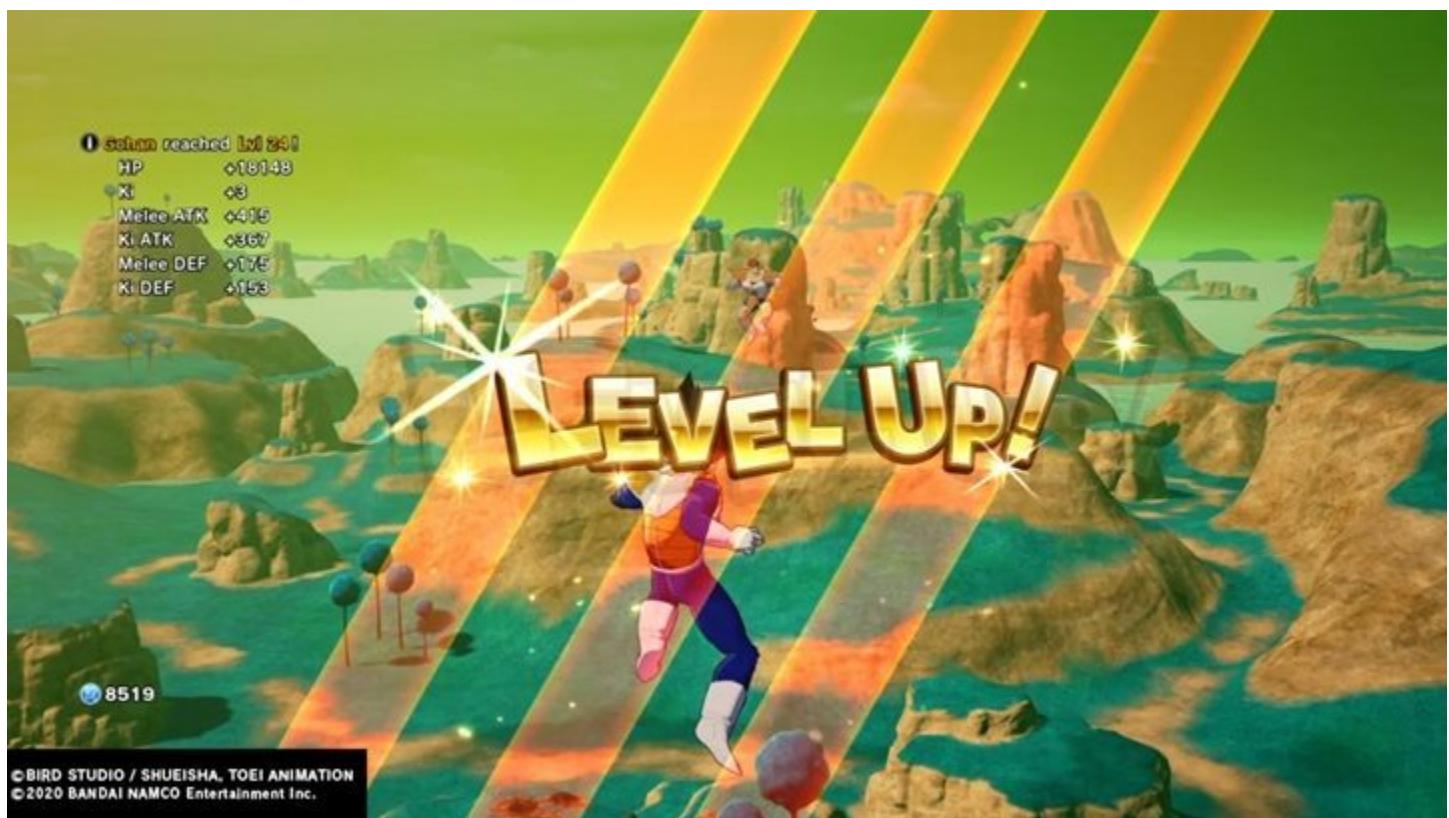

## Trophies/achievements

Not Worth My Time is an achievement/trophy unlocked after getting your first instant victory.

# How to level up fast in Dragon Ball Z Kakarot? Kakarot guide, walkthrough

Post Comment 1 0

Dragon Ball Z Kakarot has RPG elements such as leveling up. This page of the guide focuses on the leveling up process and presents several ways gaining experience fast.

The fastest way is, of course, to complete the main missions. They are the best source of experience points - almost every battle from the main story will give you another level. The second method is to complete substories that also offer a certain amount of valuable experience points, although certainly less than the main story.

If you want level up a bit, a good way is to get instant victories. Look for opponents who are 3 levels below yours to defeat them instantaneously. To do this, fly into the enemy at full speed and that group of enemies will be defeated immediately - you

will gain EXP and rewards from this battle. This is especially effective at higher levels when you go back to previously explored locations.

You should also hunt for Villainous enemies, enhanced opponents who are worth a lot of experience points. You have to fight them if you want to unlock two hidden battles with very strong bosses.

Finally, you can eat and get bonuses from the Community Boards. This will give you additional experience, however, the methods described above are more useful. Fight a lot and get passive bonuses from the Community Boards. Fight lesser enemies, and you will quickly reach a very high level, making your character very powerful.

# How to make a lot of money in Dragon Ball Z Kakarot? Kakarot guide, walkthrough

Post Comment 1 1

This page of the guide to Dragon Ball Z: Kakarot has tips on how to earn a lot of Zeni, the in-game currency. You can spend money on, e.g. buying items or materials for your machines.

The best way to get Zeni is to get Dragon Balls and ask the dragon for gold. In this simple way, you will get 30,000 Zeni instantly. Remember that you have to wait about 20 minutes to be able to collect the Dragon Balls again and make more wishes. Dragon Balls become available after completing the Frieza Saga.

The second way is to catch fish and sell their scales. Golden Fish and their scales are especially profitable - you get 3,000 Zeni for them. Buy baits and spend some time fishing- soon you will get a lot of items for sale. Fishing can be very tedious and monotonous after a while, so you should treat fishing as a break from other activities.

Another thing you can do is to hunt dinosaurs. They are less common, but you can beat them instantly and get a lot of valuable materials. Besides meat, which is very useful in cooking, you will get their fangs, which can be sold for a lot of money.

# How long to complete Dragon Ball Z Kakarot game? Kakarot guide, walkthrough

Post Comment 2 1

This page of our guide to Dragon Ball Z: Kakarot focuses on how much time you will have to spend to beat the game.

## How long does it take to complete Dragon Ball Z: Kakarot?

Dragon Ball Z: Kakarot is a really extensive RPG. It is full of side activities, offers a large open world and has numerous additional challenges. The plot itself should take around 35-40 hours, which is a very impressive result. It is worth noting that the time spent in the game may vary, as a lot of fights require us to grind a bit.

If we want to see everything the world of Dragon Ball has to offer and we don't want to rely on the guides too much, we will spend around 80-100 hours. The game

has a lot of additional activities, races, fights, training, searching for items, which, of course, will increase the time spent in the game. Moreover, many of the fights require us to have a certain level meaning that the grinding process will also make the game last longer.

## **What story does Dragon Ball Z: Kakarot offer?**

We will see all the stories known from the anime. The game starts with the Saiyan Saga where the main enemies are Raditz, Vegeta and Nappa. Then we will visit Namek and face, e.g. the ruthless Frieza. Next, we move to the Android Saga which ends with a battle against Cell. Lastly, we will face Majin Buu, a powerful demon encountered in the final part of the story. Interestingly, the developers promise to expand the source material with new scenes and provide conclusions to some of the plot lines.

# **System requirements of Dragon Ball Z Kakarot Kakarot guide, walkthrough**

Post Comment 2 1

Below are the full system requirements (minimum and recommended) for the PC version of Dragon Ball Z Kakarot. The developers have provided two versions of system requirements - minimum and recommended. Minimum system requirements ensure smooth gameplay in 1080p, 30 fps on low settings. Recommended system requirements are for high settings and 60 fps. Remember, however, that these aren't requirements created for the highest graphical settings. Therefore, it is highly likely that the game can stutter if you decide to play on the highest settings on a computer that meets the recommended system requirements.
